

ExTox Gasmess-Systeme GmbH

Planning, Manufacturing, Sales, Installation and Maintenance
of Gas Measuring Systems and Gas Detection Systems for **explosive** and **toxic** gases

With the company ExTox GmbH you have the right and reliable partner to solve your gas measurement tasks. The ExTox-Team disposes of competent contact persons with all necessary experience and practice as far as technique, projecting and regulations are concerned.

Expectations and requirements of our customers hold the spotlight. High reliability, safety and quality of our products are the most important basis for the development of our company.

Our products and service serve for the protection of health of mankind, the environment and installations. We have and want to meet this responsibility. For this we move in a field which is very much determined by legal conditions. So we for example assume the obligation to meet the fundamental safety requirements according to Directive 94/9/EC (ATEX) for products to be used in hazardous areas.

We look forward to a successful and mutual satisfactory co-operation.
